# About Us

Tehnopetrol was founded in 1997 and has quickly grown into a leading engineering, design, construction and project management company, with major operations in Bosnia and Herzegovina, neighboring countries and across Europe. Tehnopetrol has played a key role in the development of the mining, cement, oil and gas industries in the region over the past decade, drawing on its extensive industry knowledge and expertise. In response to the growing construction needs in Bosnia and Herzegovina and the region, the company's portfolio has expanded to include the oil and gas, energy, soda, cement, chemical and steel sectors. Tehnopetrol is currently working on projects that include refineries, cement plants, steel plants, power plants and the petrochemical industry.

## MISSION

We are committed to providing the most modern and efficient solutions in the field of mechanical engineering through innovation, expertise and adaptation to specific market needs. We are focused on continuous improvement, partnership and contribution to the development of the industry through a responsible and professional approach.

## VISION

We strive to become a leading regional and European leader in engineering solutions, recognized for the durability of our products, innovative and sustainable business. We want to create the future through lasting solutions that advance industry standards and respond to the challenges of the modern era.

## OUR GOALS

- Highest quality and safety standards
- Continuous development of our employees
- Modernization of production processes
- Improving customer satisfaction through customized solutions

# Quality Control

Customer satisfaction with our services is the basic setting for the business of our company. Therefore, the implementation of the quality management system was imposed as a logical sequence in the development of Tehnopetrol. We have all the necessary permits and certificates to perform activities of high standards in the oil, gas, cement and steel industries. Our commitment to achieving the highest standards of quality and safety allows us to carry out even the most complex projects in the most demanding conditions.

# Organizational Units

## DESIGN AND TECHNICAL PREPARATION

### Mechanical projects

- Pressure vessels
- Pipelines
- Transport systems
- Elements of the mechanical industry

## PRODUCTION AND ASSEMBLY OVERHAUL WORKS

### Industrial equipment manufacturing

### Assembly and dismantling

### Thermal insulation work

### Construction work

Tehnopetrol's vision focuses on sustainable development, technological progress and staff education. Tehnopetrol is dedicated to creating better opportunities for its employees and improving industry standards.

Tehnopetrol is known for its commitment to quality, innovation and teamwork. With 160 employees and 15 engineers, the company fosters a philosophy of unity and togetherness, which enables the successful implementation of even the most complex projects.

Throughout its history, the company has developed processes that ensure support for all projects. Employees rely on the company not only professionally but also personally, which creates a positive and motivating work environment.

# Manufacturing

## INDUSTRIAL EQUIPMENT MANUFACTURING

By applying the latest technologies and materials, we provide solutions that enable efficient production, optimize work processes and increase productivity. Our products include equipment for various industrial sectors, with a focus on reliability, durability and energy efficiency.

- **Crushing mills**
- **Heat exchangers**
- **Conveyors**
- **Pressure vessels**
- **Tanks**
- **Elevators**
- **Metal structures**
- **Filters**
- **Columns and reactors**
- **Industrial and process equipment**

## ASSEMBLY AND DISASSEMBLY

Our team of experts provides complete solutions for disassembly and assembly in various industries, while carefully monitoring all technical and safety standards.

- Fan mills for crushing
- Mills
- Boiler plants
- Turbine plants
- Special devices and machines
- Conveyor systems
- Filter plants
- Conveyor units for various materials  
(coal, stone, brine, process water, cement, oil, etc.)
- Elevator installation

## CONSTRUCTION WORK

Construction work includes the production and processing of materials and components used in the construction of buildings, infrastructure and industrial facilities. We focus on efficiency, safety and durability, providing materials that enable solid and stable construction, thereby contributing to the successful implementation of construction projects of all kinds.

- **Anti-corrosion protection**
- **Pipelines and pressure vessels**
- **Renovation of cooling towers**
- **Covering and cladding of roofs and facades with profiled sheets and sandwich panels**
- **Installation of all types of scaffolding**
- **Construction construction and assembly**

## **THERMAL INSULATION WORK**

We provide solutions that help reduce energy consumption, improve equipment performance and extend its lifetime.

- **Turbine plants**
- **Pipes and pressure vessels**
- **Boilers, electrostatic precipitators and thermal devices**
- **Applications in the oil and cement industry**
- **District heating system**

# Services

Tehnopetrol is known for the production of high-quality process equipment and parts that meet the strictest industrial standards. Our offering includes pressure vessels, tanks, pipelines, steel structures and specialized plant parts in the oil, gas, cement and steel sectors. Our production undergoes rigorous quality control processes, ensuring durability and reliability even in the most difficult working conditions. Combining the latest technology with years of experience, we provide products that meet the demands of the global market.

- **ENGINEERING AND DESIGN**
- **INDUSTRIAL ASSEMBLY**
- **REPAIRS AND MAINTENANCE**
- **INSULATION WORKS**

## ENGINEERING AND DESIGN

Industrial engineering and design services encompass the development and optimization of industrial systems, machinery, and equipment through the application of advanced engineering principles and technologies. Our experts offer comprehensive solutions, from initial design and analysis to implementation and testing, with the aim of improving efficiency, reducing costs, and increasing productivity. Services include design, simulation, material selection, as well as the development and customization of specific technical solutions for various industrial sectors, ensuring high quality and long-term reliability of products and systems.

## INDUSTRIAL ASSEMBLY

Industrial assembly services include the professional installation and setup of various industrial systems, equipment and infrastructure facilities. This includes the assembly of machinery, plants, transport systems, as well as the installation of electrical and pneumatic systems. Our teams use the latest techniques and tools to ensure accuracy, efficiency and safety in all stages of assembly, from preparation and transport to final commissioning. We are focused on top-notch technical execution and performance optimization, while respecting all technical norms and standards.

## REPAIRS AND MAINTENANCE

Industrial repair and maintenance services include diagnostics, repairs and routine maintenance of industrial equipment, machines and systems. Our team of experts provides fast and efficient solutions for troubleshooting, replacing damaged parts and improving equipment performance. Maintenance includes preventive inspections, servicing and system adjustments to extend operating efficiency and prevent unplanned downtime. Through high-quality service, we guarantee the reliability and long-term operation of industrial facilities, respecting all safety and technical standards.

## INSULATION WORKS

Industrial insulation works services include the application of various types of insulation on industrial equipment, pipelines, boilers and other systems to improve energy efficiency, safety and protection from high temperatures. Our experts use high-quality materials, such as mineral fibers, glass wool and polyurethane foam materials, to provide optimal protection against heat, noise and condensation. These services help reduce energy consumption, prevent heat loss and increase the operating efficiency of industrial facilities.

# Tehnopetrol Management

Our success is based on the expertise and dedication of our team. Tehnopetrol brings together experienced engineers, technicians and experts from various fields who together provide the best solution for each project. With a large number of certificates and awards, our team continuously works on developing new skills and technologies, ensuring high standards in every aspect of the business. Since we foster a culture of teamwork and personal responsibility, our employees are the key to our success and the guarantee of the quality we provide to our clients.

Our team is here to support you with all questions related to our production and services, including industrial engineering, design, installation, maintenance and other specialized services. We will be happy to answer your questions and help you find the best solution for your business needs.

## OUR TEAM
